TECHNICAL DATA SHEET

LR-6828

Ceramic Tiles Back Adhesive Emulsion

LR-6828 emulsion is a kind of acrylic copolymer emulsion prepared with Henghe special technology. Modification of acrylic with special functional groups provides “anchoring” affinity with polar and non-polar surfaces, and molecular chimerism penetrates into the substrate. Tiles back glue produced with this emulsion has excellent “calcium silicate” compatibility, high film ductility, excellent tensile strength and adhesion with substrates, APEO free. The special formula introducing with sodium ion, completely changes the traditional acid and alkali adjusting concept making paint completely free from ammonia releasing and giving us more environmentally friendly and safe operation.

Parameter:

Polymer Types	Acrylic Copolymer
Physical Appearance	Milky White
Solid Content(%)	55±1
Viscosity(CPS)	1000-4000
MFFT(°C)	0
Tg(°C)	-35
pH value	7.0-9.0
Application	Ceramic Tiles Back Glue, Substrates Adhesive Materials
Average particle	0. 10-0. 20 micron
Characteristics	Excellent Water Resistance In The Initial Stage Excellent Mechanical Performance Direct Construction

Note: The above is the typical nature of the product. It can not be regarded as the product specifications. Please refer to the specific COA. Storage temperature should be 10 °C ~ 35°C, avoid direct sunlight, if possible, should be used within 12 months.
